

**Bravo Target Safety Announces Partnership with Capstone Oilfield Services for Provision of Well Control and Blowout Recovery Services in Western Canada**

*Well control and blowout recovery services a logical complement to emergency response and safety services*

**Calgary, May 24, 2018** – Bravo Target Safety, a leading provider of industrial and oilfield emergency response and safety services, today announced a partnership with Capstone Oilfield Services, a company specialized in well control and blowout recovery services.

From its seven locations in Alberta, Bravo Target Safety serves clients in the energy, chemical, mining and construction industries across Western Canada. Principal services include: turnarounds/shutdowns, emergency response and hydrocarbon firefighting. The Bravo Target Safety team distinguishes itself by providing unrivaled service, support and response times.

Well control is a technique used during drilling, completions and work-overs to prevent the flow of formation fluid into the wellbore. Uncontrolled pressure can lead to equipment damage, injury and even fatality.

Blowout recovery occurs in the event of well control and surface control failure. It requires highly-specialized crews and equipment to safely remove debris, access failed wellhead components and reestablish well containment.

Both well control and blowout recovery are critical services deployed with the utmost urgency under very hazardous conditions.

“We are very pleased to be working with the Bravo Target Safety team, who are widely recognized for their integrity and professionalism,” says Dwight Bulloch, President, Capstone. “Our skillsets are perfectly complementary. By working together, we are offering a complete solution for our customers in the Canadian energy sector – accessible via a single phone call to either company. We look forward to growing our combined share of the market and changing the way our customers view wellsite emergency support services.”

“Working with Capstone is an obvious fit for us,” continues Kevin O’Brien, CEO, Bravo Target Safety. “They are the best-qualified blowout recovery specialists in the country. By working together, we can focus on what each party does best in order to deliver added value to our customers. Our mission is to serve the market with efficiency and transparency. We welcome our new partners at Capstone and look forward to our share success.”
