To all Staff and Customers:

Reference: Notice of Termination of Fire Truck Services

Effective immediately, Bravo Target Safety will no longer supply Combination Fire and Shower Units (Fire Trucks) to our customers.

Our fire truck fleet has been keeping workers safe on Canadian well sites for over 12 years, however the reduction in drilling and fracking activity has resulted in an oversupply of equipment in the market and has driven our utilization down to an unsustainable level.

Bravo Target Safety will continue to provide fire suppression services to well sites using our trailer-mounted compressed air foam systems (CAFS) and will continue to provide qualified fire fighters to industrial facilities.

No other service lines are affected by this change. We will continue to provide best-in-class medical services, shower units and mobile platforms to our customers' well sites.

Our facility turn-around and maintenance division is on pace for a record year and we continue to hire the industry's best talent for safety watch, high-angle rescue, equipment technician and leadership positions.

Thank you for your continued support as we strive to get all workers home safely every day,

Kevin O'Brien
Chief Executive Officer

**THE MOST RELIABLE, RESPONSIBLE AND RESPECTED
INDUSTRIAL SAFETY COMPANY IN CANADA**
